CAAP
Outcomes Assessments to Foster Excellence in General Education

The Collegiate Assessment of Academic Proficiency - CAAP - is the ACT assessment program that enables you to measure, evaluate and optimize the outcomes of your institution's general education program.

CAAP generates the results you need to:
- Satisfy accreditation and accountability reporting requirements
- Measure your students' achievement levels on a group AND individual basis
- Document your students' "performance gain" over time
- Compare your students' achievement levels with national user norms
- Evaluate the strengths and weaknesses of your general education program
- Analyze what interventions may be necessary to optimize results
- Advise individual students how to achieve academic success
- Determine student eligibility for upper-division studies

Over 300 institutions nationwide use CAAP to assess student outcomes in general education.
