The Master of Science in Management is a 36-semester hour, 12-course program designed to offer graduates of undergraduate programs a specialized proficiency in management skills and decision making, enabling them to perform in both general and specialized managerial roles such as human resource management, healthcare management and leadership and organizational effectiveness. The objectives of the program are to prepare students to:

1. Develop managerial problem solving skills required in a dynamic and uncertain business environment

2. Synthesize and apply knowledge, theories and concepts from various business and behavioral science disciplines in their problem solving analysis

3. Identify and develop alternative problem solutions

4. Evaluate and choose from among the alternatives identified

5. Effectively communicate the results of their analyses

This degree can be completed in as little as 15 months through instructor led on-site and online coursework. In addition to several concentrations for this degree program, a concentration in Applied Management (30 semester hours) is available for company sponsored cohort groups at select locations and can be completed in 12 months.

The Master of Science in Criminal Justice (MSCJ) is designed to broaden and enhance the student's ability to understand, analyze and evaluate issues that confront the American criminal justice system. The objectives of this program are:

1. To prepare students to understand, analyze and evaluate the principles and functions of personnel administration in criminal justice applications

2. To prepare students to understand, analyze and evaluate trends and developments affecting the interpretation of the U.S. Constitution in light of historical case precedent

3. To prepare students to understand, analyze and evaluate issues that affect the structure and functioning of the criminal justice system

4. To understand, analyze and evaluate the effectiveness of the American judicial process with respect to its legal basis, organization and management

Two options are available to students which include a core of required courses totaling 12 semester hours, the completion of a non-thesis 18-semester-hour concentration and the completion of an additional six credit hours with the thesis option.

- Option I is a 30-semester-hour program consisting of 12 semester hours of required core courses and selected electives totaling 18 semester hours. A thesis is not required.
- Option II is a 36-semester-hour program consisting of a 12-semester-hour core of required courses, selected 18-semester-hour electives, a thesis practicum and a thesis.

Any student completing the course work with a 3.0 GPA or better, fulfilling candidacy requirements and successfully completing the required comprehensive examinations and any research requirements will be awarded the master's degree. A grade of “D” or “F” in a core course requires that it be retaken. A grade of “D” or “F” in an elective course requires that it be retaken or another elective taken in its place.

How is eCampus different from a traditional classroom setting?

Courses offered through Troy University’s eCampus have the same high academic standards as other Troy University courses. Students enrolled in distance-learning courses through eCampus must complete the same or comparable requirements as students in traditional classes. Because of the flexible scheduling, you must be responsible, self-motivated and a self-starter to complete required assignments on time.

What is Distance Learning?

Distance learning enables any student, regardless of age or location, to earn an accredited college education. Our distance-learning programs are growing rapidly due to the increased demand from working adult students for courses delivered on an “any time-any place” basis. For more information about a particular program, visit our Web site troy.edu and click on eCampus.

What are Distance-Learning courses like?

Several course delivery methods are used to reach students around the world. The courses are Internet-based and use e-mail, electronic bulletin boards, chat rooms, online mini-lectures and other Web-based interactive lessons.
