ACCREDITATION
Troy University is accredited by The Commission on Colleges of The Southern Association of Colleges and Schools to award associate, bachelor's, master's and the education specialist degrees. Contact the Commission on Colleges and Schools at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions regarding the accreditation status of the institution or if there is evidence that appears to support Troy University's significant non-compliance with a requirement or standard.
Distance learning and virtual classrooms are now standards among the educational and testing communities. Yet, validating testing integrity and degree credibility have remained under the microscope for academic institutions of all sizes.

Troy University, a global leader in combining non-traditional learners with cutting-edge technology, recognized the need for a new methodology suited for the virtual classroom and testing environments.

The Securexam® Remote Proctor System is the solution for educators concerned with maintaining academic integrity in a non-traditional classroom setting. This breakthrough testing tool was developed in conjunction with leading academic institutions, including Troy University and Software Secure, Inc., of Cambridge, Massachusetts.

For non-traditional students, the Securexam® Remote Proctor System eliminates the need to travel to a traditional campus setting or arrange for an approved proctor for every testing situation. For universities and others, the Securexam® Remote Proctor System technology offers a cost-effective option that integrates directly with the popular, industry established Blackboard™ Course Management System.

The Securexam® Remote Proctor System is a single-unit compact piece of hardware that ensures testing integrity through a series of security measures that includes:

1. Biometric verification to confirm identities
2. Real-time, streaming audio and video to monitor exam conditions
3. A unique Securexam® Desktop to restrict access to additional online resources

How it works

1. Students load software and plug the Remote Proctor into a computer’s USB port
2. Security settings are established by the instructor
3. Fingerprint authentication verifies the user’s identity
4. Securexam® launches a web-browser that locks down the computer
5. Streaming video and audio recorded during test are uploaded for review
